April Release 2026 - National Boundary Layer Changes

The Following log lists the changes to the National Boundary Layers since the January 2026 NBL Change Log.

National Dispatch Boundaries:

- 3/18/2026: Updated Boundary between Blue Mountains Interagency Dispatch Center and John Day Interagency Communications Center
- 1/20/2026: Updated multipart polygon. The part that was disconnected from the primary polygon was removed from NVLIC and combined with UTCDC.
- 2/26/2026 updated the boundary between UTUBC and WYCPC.

National Initial Attack Frequency Zone Federal:

- 3/18/2026 Updated the boundary between OR06 & OR07
- 2/26/2026 Updated boundary between UT05 & WY06.

GACC Boundaries:

- 2/26/2026 Updated GACC boundary between GBCC and RMCC

Initial Attack Frequency Zone (International): Removed from national boundary layer management. This dataset is managed by the NIICD Communication Duty Officer Coordinator.
