

I need to **view** and download incident maps, IAPs, IR data from NIFC File Share / FireFTP.

I need to **upload and share** incident maps, IAPs, and other files to NIFC File Share site for others to see.

Do you have a **FAMAuth** account?

Note: Ensure that it works on your mobile device and computer.

Yes

No

Set up FAMAuth account. You will need an eAuth or login.gov account before creating a FAMAuth account. Note that most federal and state agencies require to have one of these.

Login to FAMAuth, navigate to FAMShare, request access if you do not have it already.

Note: If you previously had access to upload to FireFTP, you were automatically given FAMShare access.

Wildland Fire Application Portal - FAMAuth

Request application roles for FSHARE - PROD

- Aviation Hazards
- Base Info
- Incident Specific Data
- Incident Specific Maps
- NIROPS
- OLMS
- OLMS 10 Tanker
- OLMS Coulson
- OLMS Latitude

Verification contact information

Enter the contact who can validate your need to access this application.

- You CAN NOT validate your request (Do not enter your own name, e-mail or phone number).
- Agency employees: enter manager or supervisor.
- Contractors/Vendors: enter your government contracting office personnel.

Use existing contact

Contact's first name	Contact's last name

Save Cancel

Select which type of data/content you need upload to NIFC Fire Share based on your day job or position you will perform on an incident.

98% of those who need to share/upload to NIFC File Share only need **Incident Specific Data** and **Incident Specific Maps**. **Again, this is only for uploading content.**

Submit FAMShare Request and follow up with an email directed to you [GACC FAMShare Approver\(s\)](#). Include your relevant IQCS Qualifications and/or day job title for access requests.

Once you receive an email stating your access has been changed, login to the FAMShare app. You will login using FAMAuth.

FAMShare

NIFC File Share Information

Attention, the Authenticated Access area of the NIFC File Share will require authentication via FAMAuth starting May 4, 2026. No action is needed for users that are able to login to FAMAuth using eAuthentication or Login.gov. Users that don't have eAuthentication or Login.gov will need to select Login.gov and create an account.

It is recommended to begin transitioning publicly available files (such as maps, etc) to the Incident Specific Maps area. This area will not require authentication after May 4.

Starting May 4 all folders under the Authenticated Access area will require authentication via FAMAuth. In addition, the path to these folders will change. For example, https://ftp.wildfire.gov/public/incident_specific_data changes to https://ftp.wildfire.gov/protected/incident_specific_data. Bookmarks and QR codes to these folders will need to be updated as a result. The path for the Incident Specific Maps folder will not change.

Welcome to the **NIFC File Share**, an official site for interagency wildland fire incident data and documents.

This site is intended for **short-term interagency sharing**, not as a file archive or records repository. There shouldn't be anything data that isn't stored in a safer location, or much data that carries over from season to season.

Many people have access to shared folders, so please retain copies of anything you post.

Data backups are not performed on the NIFC File Share.

[Incident Specific Maps](#)

Authenticated Access (starting May 4, 2026)

- [Incident Specific Data](#)
- [Base Information](#)
- [NIROPS Information](#)
- [Predictive Services Information](#)
- [National BAER Information](#)

You are set. On May 4th, you will be able to find what you need on the NIFC File Share site.

When you navigate to a folder with PII, such as an IAP, you will be prompted to login with your FAMAuth account.
