Adding Fuel Moistures for Fuel Types being Monitored: 34

Adding Fuel Moistures for a new Fuel Type: 38

Field Sample Data Upload 40

Overview

The Field Sample Database (FSD) is a web-based query system that enables users to view sampled and measured live- and dead-fuel moisture information. The FSD is a module within the Fire Environment Mapping System (FEMS). The system utilizes a database that is routinely updated by fuels specialists who monitor, sample and calculate fuel moisture data.

Purpose of FSD

FSD serves multiple purposes. Firstly, NFMD provides a repository for sampled live- and dead-fuel moisture. Fuel moisture data can now be stored in a database that serves as a national archive of the fuels record. Secondly, it provides a resource for anyone who has a need for fuel moisture data. A national database eliminates the need for multiple requests for data or exhaustive searches for such data, which can often result in little or no success. Thirdly, it allows for easy viewing of the data in formats that are consistent with other applications used in the land management arena.

History of FSD

The idea of a national fuel moisture database arose in late 2001 when the Predictive Services program was in its infancy.

Over time, fuels sampling data became available to Predictive Services. Unfortunately, the data arrived in multiple formats – spreadsheets, web pages, Portable Document Format (pdf), lists and others – which were difficult to synthesize in a coherent fashion. In Fall, 2005, BLM Utah fuels specialists and Eastern Great Basin (EGB) Predictive Services meteorologists analysis and comparison.

In Spring, 2006, EGB introduced the EGB Fuel Moisture Database. During the busy fire season in central Idaho, the EGB database became an indispensable tool for fire behavior specialists working on fires in the area. When the Predictive Services meteorologists from all the Geographic Area Coordination Centers gathered in November 2006, they agreed to develop a national database built on the EGB model. The NFMD is the result.

At a national level NFMD was hosted at the Fire Science Lab in Missoula, Montana. NFMD has existed there, with limited funding form since early 2018.

In the past couple of years, the database has become unstable and required a rebuild in 2023. User access continued to be an issue. In 2022, an effort to modernize and centralize the database to bring the database under the FEMS application was initiated.

At the end of 2023 there was a final push made to complete the FSD Module within FEMS and deploy for the 2024 field season.

The initial release of the Field Sample Database was released in FEMS 2.0 in April 2024.

The map display of the Field Sample Database was included in the release of FEMS 3.1 in March 2025.

Additional reports functionality with PowerBI was introduced in FEMS 3.4.

FEMS V 3.5 focused on adding Fire Danger Catalog Management functionality for FEMS Admin users. A limited number of Mesonet stations were also added for both Weather and Fire Danger.

What's New in V3.6

- Improved Fire Danger charts.

- Expanded Period of Record (POR) for all stations.
- Additional Mesonet stations were added, some with restrictions.
- Data flags for stations to indicate gaps in data.

Access

The Field Sample Database is accessed through FEMS. FEMS is an open system available for public viewing. [FEMS \(usda.gov\)](https://fems.usda.gov)

A FEMS account will provide access to additional data.

Requesting Access

To request access through FAMAuth ([FAMAuth](#)) either with a Login.gov account or through eAuth.

See the [FAMAuth User Guide](#) for assistance in creating a FAMAuth account.

Once logged in:

Locate your account dropdown in the upper right corner.

Select “Request app access and roles”.

Select “FEMS” and “PROD”.

Search for your Area (GACC) Editor to request roles:

Field Samples

Search All Sites...

Area: [Dropdown Menu]

Group Status: All

Groups: All

ADD AN AREA ADD A GROUP ADD A SITE

GROUP EDITOR(S)	AREA NAME ↑	AREA EDITOR(S)	GROUP STATUS
Jen Barnes, Eric Show More...	Alaska	Eric Miller	Active
Bryan Daigle	Eastern Area	Matt Malesic, Travis Show More...	Active
David Sloan, Steven Show More...	Eastern Area	Matt Malesic, Travis Show More...	Active

Chad Graeve, Lindsey Show More...	Eastern Area	Matt Malesic, Travis Show More...	Active
Glenn Palmgren, Keith	Eastern Area	Matt Malesic, Travis	Active

Until field sample roles are granted users will not be able to enter fuel sample data.

Roles and Definitions

- Field Sample Collector
 - Enters and edits Fuel Moistures
- Field Sample Group Editor
 - Can enter and edit Fuel Moistures
 - Creates and edits Field Sample Sites
 - Creates and edits Field Sample Groups
- Field Sample Area Editor
 - Can enter and edit Fuel Moistures and Sample Sites
 - Creates and edits Field Sample Groups
 - Creates and edits Field Sample Areas

Request access for the role that fits your needs.

You will be required to list a contact. You cannot list yourself.

Home Screen

1. Click on the “Hamburger” icon in the upper right:

2. Click on the “LOGIN” button.

3. A list of menu options will appear; selections will vary with user roles:

4. Data can be displayed in UTC or Standard Time:

Accessing Fuel Samples

The Field Sample Tables can be accessed by either the Map or Tables Menu.

Map Option

Navigating Maps

Two options are available for viewing the map.
World Topo is the default.

Clicking on the “USGS IMAGERY” label will change the map.

Viewing Field Sample Data

1. Data Type: Select Field Sample
2. Filter Field Sample Data: This step is essential to display sites with data.
3. Selections on the left side will determine the map data displayed.
4. You can use the “Search” option or navigate through the map.

5. Click on the site to display the current data.

6. Select the desired fuel type.
 - a) When a specific fuel type is selected, a black line will depict the current fuel moisture values.

7. Be sure to login to be able to change between fuel types.

IMPORTANT: Only authenticated users will be able to change to a different fuel type.

8. Scroll to see the fuel moistures in table form.

9. Click on the “Go To Site” link to access the tables for additional information.
10. Users with authorized roles will be able to perform edits and record fuel moistures from here.

The screenshot shows the FEMS Fire Environment Mapping System desktop interface. The top navigation bar includes the FEMS logo, the text "FIRE ENVIRONMENT MAPPING SYSTEM", the time "4:22:25 pm", the date "20 Sept 2025", a UTC (0) dropdown, and a user profile icon. The breadcrumb trail reads: "FIELD SAMPLE HOME > GREAT BASIN > SAWTOOTH SOUTH > ID-STF SUBLETT". Below this, the page title is "ID-STF Sublett" with a "SITE METADATA" link. A search bar labeled "Search All Sites..." is present. The main section contains filter fields for "Sample Start Date" (09/19/2024), "Sample End Date" (09/20/2025), "Sample Type" (All), "Sample Status" (All), "Category" (All), "Sub-Category" (All), and "Method" (All). There are links for "Clear Filters" and "+ New Sample". Below the filters is a table with the following data:

	TYPE	CATEGORY	SUB-CATEGORY	METHOD
>	10-Hour	Dead		+
>	100-Hour	Dead		+
>	1000-Hour	Dead		+
>	Douglas-Fir	Tree		+
>	Duff	Dead		+

Data Tab:

Under the “Data” tab, date selection and dropdowns will aid selections by narrowing the search based on: Category, Fuel, Sampling Method or Sub-Category. However, since most samples may not list Sampling Method or Sub-Category, it is recommended to leave those fields as “None”.

The screenshot shows the FEMS Fire Environment Mapping System mobile interface. The top navigation bar includes the FEMS logo, the text "FIRE ENVIRONMENT MAPPING SYSTEM", and a "DATA" tab with a search icon. Below the navigation bar, the "DATA TYPE" dropdown is set to "Field Sample". The "DATE" section shows "Start Date" (01/07/2025) and "End Date" (01/07/2026) with a note: "Need more than a year of data? Please sign in". The "FIELD SAMPLE DATA" section includes a "Category" dropdown (Select a Category), a "Fuel" dropdown (Select a Fuel), a "Method" dropdown (None), and a "Sub-Category" dropdown (None). A "Search" link is also present.

Filter Tab:

Under the “Filter” Tab the elevation filter can be used to narrow the stations displayed.

Table Option

Navigating Field Sample Tables

To View Field Sample Tables:

1. Select the “Tables” from the menu option.
2. Select the “Field Samples Sites” tab:

3. The blank table will appear.
4. Use the dynamic search function to view the desired Sample Site.
5. Select the “Sample Site”.

6. Select “Sample Type”. It is best to select “ALL” to ensure the greatest likelihood of viewing data.
7. Select Sample Dates.
8. Select the “View Table” button.
9. The use of additional filters will provide views of specific data.

DATE	SAMPLE AVG VALUE	TYPE	SUB-CATEGORY	METHOD
07/23/2025	11.00%	1000-HOUR		
07/23/2025	102.00%	DOUGLAS-FIR		
07/23/2025	91.00%	FIR, SUBALPINE

Data Download

Additional data in FEMS is available as a Data Download.

1. Click on the “Hamburger” icon to open the Menu:

2. Select the “Download” option in the menu:

3. Select “Field Sample” or Site Metadata” as the Data Subject Area:

The screenshot shows the 'FEMS Data Download' interface. At the top, there are two tabs: 'Download' (highlighted with a green bar) and 'Queued Download'. Below the tabs, the title 'FEMS Data Download' is displayed. A note states: 'Options to refine your download will appear as you make selections. Changes to selections may impact your available options and selections.' The 'Data Subject Area' dropdown menu is open, showing options: 'Field Sample' (selected), 'Weather', 'Site Metadata', and 'Fire Danger'. Below the dropdown, there are fields for 'Start Date' and 'End Date'.

Field Sample Data Download

1. Select “Field Sample” from the “Data Subject Area”.
2. Using the dynamic search field, select stations.
 - a. “Select All” and multi-select options are available.
 - b. Undesired stations can be “X”ed out.

The screenshot shows the 'FEMS Data Download' interface with the 'Download' tab selected. The 'Data Subject Area' dropdown menu is open, showing options: 'Field Sample' (selected), 'Weather', 'Site Metadata', and 'Fire Danger'. Below the dropdown, there is a search field with the text 'Boise'. Below the search field, there is a 'Date Range' section with 'Start Date' and 'End Date' fields. The 'Start Date' is set to '02/09/2026' and the 'End Date' is set to '03/11/2026'. At the bottom, there are two buttons: 'Download Data' and 'Copy Data Link'.

Program Administration

1. Sign into FEMS and select “Field Sample” from the menu.

2. Field Samples can be filtered by Area (GACC), Group Status (Active, Inactive, All) or Group.
 - a) Buttons to add Areas, Groups and Sites are available based on roles. Greater functionality will be released in the future.

The screenshot shows the FEMS Field Samples interface. At the top, there's a header with the FEMS logo and the text "FIRE ENVIRONMENT MAPPING SYSTEM". The main title is "Field Samples". Below the title, there are three dropdown filters: "Area" (set to "All"), "Group Status" (set to "All"), and "Groups" (set to "All"). To the right of these filters are three buttons: "ADD AN AREA", "ADD A GROUP", and "ADD A SITE". Below the filters is a table with the following columns: "GROUP NAME", "GROUP EDITOR(S)", "AREA NAME", "AREA EDITOR(S)", and "GROUP STATUS". The table lists several field sample groups, including AK INTERAGENCY, ACADIA NP, CHEQUAMEGON-NICOLET NF, HIAWATHA NF, HOOSIER NF, HURON-MANISTEE NF, IA-DNR, and MI-DNR. Each row has a red circle around the "GROUP NAME" column and a red circle around the "GROUP EDITOR(S)" column. The "ADD A GROUP" button is also circled in red.

Field Sample Area Editor

Adding, and Editing Field Sample Groups is a role that is assigned to the **Field Sample Area Editor**.

To Add a Field Sample Group:

1. Sign into FEMS and proceed to the Field Sample tab.
2. Click on the “Add a Group” button:

This screenshot is similar to the one above, showing the FEMS Field Samples interface. However, the "ADD A GROUP" button is highlighted with a blue border. The table of field sample groups is also visible, but the red circles around the "GROUP NAME" and "GROUP EDITOR(S)" columns are not present in this version of the screenshot.

3. A popup box will appear.

The screenshot shows a web form titled "Add a Group". It contains several input fields: "Group Name *" with a placeholder "Input Name", "Area Name *" with a search icon and placeholder "Search Areas", "Primary Contact" section with "Contact Name *" (placeholder "Search Names"), "Contact Phone" (placeholder "Contact Phone"), "Ext." (placeholder "Ext."), "Contact Email" (placeholder "Contact Email"), and "Position Title" (placeholder "Position Title"). There is a link "Create New Contact" with an external icon. At the bottom right are "Cancel" and "Add" buttons.

4. Complete the required fields.
 - a) Select "Area Name" from the dropdown list.
 - b) The "Primary Contact" field is a searchable field to avoid duplicate entries in the database.
 1. More than one contact may be listed.
 2. **See "Add a New Contact" below to add a new contact.**
5. When all information has been entered, click on the "Add" button.
6. A banner will appear at the top to indicate that a Group has been created.

7. Each Group must have a unique name. If a duplicate is attempted a red error banner will appear at the top.

8. To add another group, click on "Add a Group" again and begin a new group.

To Add a New Contact:

1. Select “Add New Contact”:

To Edit a Field Sample Group:

1. Select the **Edit link** to the right of the Field Sample Group name.

The screenshot shows the FEMS Fire Environment Mapping System interface. At the top, there's a green header with the FEMS logo, the text 'FIRE ENVIRONMENT MAPPING SYSTEM', the time '5:17:08 pm', the date '20 Sept 2025', and a user profile 'LW'. Below the header, the 'Field Samples' section has a search bar 'Search All Sites...'. There are three dropdown menus for 'Area' (Great Basin), 'Group Status' (All), and 'Groups' (All). To the right of these are three buttons: 'ADD AN AREA', 'ADD A GROUP', and 'ADD A SITE'. Below these is a table with columns: GROUP NAME, GROUP EDITOR(S), AREA NAME ↑, AREA EDITOR(S), and GROUP STATUS. The table lists several groups, including 'ARIZONA STRIP DISTRICT', 'ASHLEY NF', 'BOISE FO', 'BOISE NF', 'BOISE NORTH', and 'BRIDGER-TETON NF'. The 'BOISE NORTH' row is highlighted, and its edit icon (a blue pencil) is circled in red.

GROUP NAME	GROUP EDITOR(S)	AREA NAME ↑	AREA EDITOR(S)	GROUP STATUS
> ARIZONA STRIP DISTRICT	Greta Hyland, Cody Show More...	Great Basin	Matt Ginder, Dave Show More...	Active
> ASHLEY NF	Mike Bertagnoli	Great Basin	Matt Ginder, Dave Show More...	Active
> BOISE FO	Chris Cromwell	Great Basin	Matt Ginder, Dave Show More...	Active
> BOISE NF	Ryan Jones, Andra Show More...	Great Basin	Matt Ginder, Dave Show More...	Active
> BOISE NORTH	Shelby Law	Great Basin	Matt Ginder, Dave Show More...	Active
> BRIDGER-TETON NF	Andy Norman, Paul Show More...	Great Basin	Matt Ginder, Dave Show More...	Active

2. A popup box will appear.

The 'Edit Group' popup form is displayed. It has a title 'Edit Group'. Below the title, there are two main sections. The first section contains a 'Group Name *' field with a blue border and the text 'Boise North'. Below it is an 'Area Name *' dropdown menu showing 'Great Basin'. The second section is titled 'Primary Contact' and contains several fields: 'Contact Name *' with the text 'Shelby Law' and a 'Create New Contact' link; 'Government Phone' with the text '801-531-5320' and an 'Ext.' field; 'Government Email' with the text 'shelby.law@boisecounty.gov'; and 'Position Title' which is empty. At the bottom of the form are 'Cancel' and 'Save' buttons.

3. Edit the requested fields.
 - a. Select "Area Name" from the dropdown list.
4. Additional contacts may be added.
 - a. The Field Sample Database will not allow duplicate contacts to be entered.
 - b. If a duplicate is attempted a red error banner will appear at the top.

5. When finished, click on the Save Changes button to save the information to the database.
6. A banner will appear at the top to indicate that a Group has been saved.

Field Sample Group Editor

Managing a Field Sample Site

Creating, Editing and Deleting Fields Sample Sites is a role that is assigned to the **Field Sample Group Editor**.

To Add a Field Sample Site:

1. Sign into FEMS and select “Field Sample” from the menu.
2. Click on the “Add a Site” button.

3. A popup box will appear.

The screenshot shows a web form titled "Add a Site". It contains several input fields: "Site Name*" with a placeholder "Input Site Name"; "Latitude*" and "Longitude*" each with a placeholder "Input Latitude" and "Input Longitude" respectively; "Elevation*" with a placeholder "Enter Elevation"; "Remarks" with a placeholder "Enter Remarks"; "Site Start Date*" with a placeholder "Site Start Date" and a calendar icon; and "Agency Landowner*" which is currently empty. At the bottom right of the form are two buttons: "Cancel" and "Add".

4. Fill in the required information.

- a) Site Name – Needs to be unique.
- b) Latitude and Longitude.
- c) Elevation
- d) Remarks should pertain to the site. **Remarks related to the sample will be available in a future release.**
- e) Site Start Date – available with a calendar option.

This screenshot shows the same "Add a Site" form as before, but with a calendar popup open over the "Site Start Date" field. The calendar is for July 2025 and shows the days of the week (S, M, T, W, T, F, S). The date 30 is circled in blue. The "Site Start Date" field has a calendar icon next to it. The "Agency Landowner*" field is still empty.

- f) Agency Landowner – Select from a dropdown – searchable field.
 - g) Group Name – Select from a dropdown – searchable field.
 - h) Area Name – Select from a dropdown – searchable field.
 - i) Status – Select from a dropdown.
 - j) State - Select from a dropdown – searchable field.
5. Be sure to scroll down for then additional fields.
